The students are requested to confirm their participation to respective supervisors, and also intimate the time period when they want to undergo the training course to their supervisors. Further correspondence, if any, may be made with the respective supervisors.

Since the Institute is encouraging large number of students from various universities/departments for training, it will not be possible for the Institute to provide you with the accommodation. **The students have to make their own arrangements for stay, and also the Institute will not provide any sort of financial support to them to carry out their work.**

It is also very important to note that you are not allowed to carry out analysis of your own samples on the instruments available in the Institute for your summer training.

Keeping in view the cost constraints being spent by the Institute in running the various instruments it is a request to all the Supervisors to train their students on their own samples or on the available data with them instead of analyzing the samples brought by students with them.

The supervisors are requested to strictly adhere to these norms.

The students are advised to complete their summer training by 28th June 2019. In case students want to extend their training further, they should seek the approval of the competent authority.

Thanking You

Dr. R. K. Sehgal
Technical Secretary to the Director
